

System Logs

Last Modified on 12/17/2019 2:51 pm EST

From the main menu, navigate to **System Settings > System Logs**.

System Logs provide an audit trail of all activity within Kerauno. This tool is useful for monitoring user activity, tracking, or troubleshooting changes made to the system.

Main Menu

The screenshot displays the 'SYSTEM LOGS' interface. At the top, there is a header with a warning icon and the text 'SYSTEM LOGS'. Below this, the title 'System Logs:' is followed by a horizontal separator line. The 'Search Text:' section contains a search input field with a magnifying glass icon and the text '10.0.0.0'. Below the search field, there are two date selection fields: 'Start Date:' with a calendar icon and the date '01-June-2019', and 'End Date:' with a calendar icon and the date '15-November-2019'. At the bottom of the interface, there are three green buttons: 'Render Report' with a pencil icon, 'Print Report' with a printer icon, and 'Export to CSV' with a document icon.

Render Report

Enter search criteria in the **Search Text** field to isolate report results (e.g., log in, disable, report).

Report Output Options

- Click **Render Report** to view the report onscreen in Kerauno. A report can be printed or exported to CSV once rendered on screen.
- Click **Print Report** to route to a local printer or download as a PDF.
- Click **Export to CSV** to use the data in Microsoft Excel or other data management tool.
